

Safeguard your seniors and staff.

NOTIFY® provides the simplest way to protect your most valuable assets.

NOTIFY is an indoor track and trace application that is touchless and automatic. The system uses plug-in Bluetooth beacon technology to continuously trace the location of people inside a facility. It provides simple, accurate monitoring of seniors and workers, visitors, and even the location of critical medical assets with one easy to install and use system. Data is viewed on a customizable, real-time dashboard.

As easy as one, two, three.

1. Set-up zones using **NOTIFY** plug-in gateways, or power gateways from existing WAP devices.

2. Issue beacons. A selection of wearable, water-resistant, lightweight beacons in wristbands, fobs attached to lanyards, or badges.

3. Get real-time location, dwell-time, and various interaction reports from **NOTIFY** dashboard.
