Data Dashboard - Track your assets in real-time, including location, movement, check-in/check-out, dwell-time, and numerous interaction reports from the **rfidCollect** dashboard. Data can be stored in your back-end ERP system or Cloud-based.

Premium grade portals are plug 'n play. Easy to install with maximum performance.

The base plate is removable so portals can be mounted flush to the wall or flush alongside baseboard. The portal back is flat and pre-holed for wall or baseboard mounting.

All portals have a face-plate drilled out to match virtually any mounting pattern. Antenna cables are tucked away neatly behind the face plate.
